NEBS Certified

The PowerSafe GU product line ranges from 930Ah to 3900Ah, and is the largest clear flame retardant flooded cell in the industry. The PowerSafe GU battery features flat plate construction with calcium alloy grids ideal for any long duration float application. Since 1978, the GU has been the standard in the telecommunication industry. It is ideal for central office and mobile switch applications.

With the multi-directional design of the post, PowerSafe GU cells are easily configurable in any orientation, with cells either parallel to the rack support rails to optimize battery system footprint or perpendicular to the rails for easier element inspection. The new post design enables cell maintenance without taking the entire battery system offline. This is due to the ability to use four intercell connectors regardless of the cell orientation. Two connectors can be left in operation while the other two connectors are being remade.

The PowerSafe GU product line also employs EnerSys' exclusive Slide Lock™ post seal that allows natural plate growth over time without degrading the seal and an innovative tongue and groove jar-to-cover seal to prevent leaks.

### Features

- Capacity Range: 930Ah - 3900Ah
- Flat Plate construction-calcium grid alloys. Well suited for long duration, float applications.
- Largest single cell battery (up to 3900Ah) in a clear flame retardant jar.
- Optional flame retardant (UL94-VO/L.O.I. 32%) container.
- Slide Lock™ Post Seal allows natural plate growth without degrading post seal.
- Innovative tongue and groove jar-to-cover seal.
- Configurable with plates either parallel (optimize footprint) or perpendicular (inspection of the element) to rack support rails.

### Specifications

- Plate thickness:  
Positive: 0.30 in/7.6 mm  
Negative: 0.20 in/5.1 mm
- Plate dimensions:

	Height	Width
Pos:	17.6 in/447 mm	12.7 in/323 mm
Neg:	17.6 in/447 mm	12.7 in/323 mm
- Sediment space: 1.32 in/34 mm
- Electrolyte over plates: 3.40 in/86 mm
- Container:  
Styrene Acrylonitrile Copolymer, GU-09 to GU-45  
Optional flame retardant (UL94-VO/L.O.I. 32%) PC, GU-09 to GU-13  
Optional flame retardant (UL94-VO/L.O.I. 32%) PVC, GU-15 to GU-45
- Cover: Flame Retardant PVC, UL94-VO/L.O.I. 32%
- Separators: Microporous rubber
- Retainers: "Vitrex" - glass fiber
- Post type: Cast Lead Posts  
GU-9 through GU-13 Single Post  
GU-15 through GU-45 Double Posts
- Post seal type: Slide-Lock™
- Plate suspension type:  
Positive: Bridge hung  
Negative: Bottom supported
- Electrolyte withdrawal tube: One per cell
- Vent type: Flame Arrestor, Fused Alumina
- Float voltage setting:  
Acceptable min/max: 2.17/2.26Vpc  
Recommended: 2.25Vpc
- Specific gravity: 1.215 at 77°F (25°C)
- Bolt connectors: Stainless steel, standard English measure, hex-head
- Intercell connectors: Lead-plated copper
- All inter-cell, inter-tier, inter-step, end-to-end inter-rack, back-to-back inter-rack connectors, and terminal plates are included with every battery. Terminal lugs and across-aisle inter-rack connectors are not included.
- With 12 or more cells, the following accessories are included:  
Portable hydrometer, hydrometer holder - wall mount, thermometer, cell number sets, cell lifting device and flame arrestor

\* Suffix number indicates total plates per cell. Prefix indicates number of cells per jar.

\*\* 0.25" must be added between cells for spacing purposes when calculating total battery length.

\*\*\*Overall dimensions represent the GU-9 thru GU-21 with plates oriented perpendicular to rack rails and GU-23 thru GU-45 with plates oriented parallel to rack rails. For optional GU-23 thru GU-45 with plates perpendicular to rack rails, length and width dimensions must be switched.
