

Battery Range Summary

Features & Benefits

- Designed for use in unreliable grid and renewable energy applications
- Wide Ampere-hour range: 92 to 1870Ah
- Choice of 2V DIN-size cells and 12V front terminal blocs
- Excellent cyclic performance
- Exceptional fast charge acceptance ability
- Deep discharge recovery
- Resilient to harsh environments
- TPPL Technology – high energy density
- Up to 2-year shelf life
- Low total cost of ownership

The EnerSys® SuperSafe® SBS® XC range of valve regulated lead acid cells and monoblocs is designed to meet the challenging demands of unreliable grid and renewable energy applications.

SuperSafe SBS XC benefits from EnerSys' state-of-the art Thin Plate Pure Lead (TPPL) technology platform. The fast recharge and high cyclic performance of SuperSafe SBS XC make it the perfect solution for challenging operating conditions in poor grid environments where there is a high risk of uncontrolled partial state of charge (PSoC) operation. It has the benefit of resilience against deep discharge.

The high cyclability of SuperSafe SBS XC and its ability to operate in uncontrolled PSoC conditions, where ambient temperature can often be high, provides the operator significant benefits in terms of total cost of ownership (TCO).

Construction

- Thin Plate Pure Lead (TPPL) grid technology for high cycle life and fast charging capability
- Negative plates provide a balance with the positive plates to ensure optimum recombination efficiency
- Low resistance microporous glass fibre mat separator with high absorption and stability
- Containers and lids in UL94 V-0 rated flame retardant ABS material, highly resistant to shock and vibration
- High grade dilute sulphuric acid fully absorbed into the separator to prevent spillage in case of accidental damage
- Dual-seal terminal design to prevent leakage over the product life
- Self-regulating pressure relief valves prevent the ingress of atmospheric oxygen
- Flame arrestors built into each bloc/cell for operational safety

Installation & Operation

- Designed for operation in unreliable grid and renewable energy applications
- Monoblocs and cells can be installed in cabinets or on stands close to the point of use. A separate battery room is not necessary
- Products can be mounted in any orientation except inverted. EnerSys® recommends to install SBS XC 320-1800 cells in horizontal orientation
- Recommended float charge voltage: 2.29Vpc at 20°C (2.27Vpc at 25°C)
- Wide operating temperature range: -40°C to +50°C
- Up to 24 months shelf life at 20°C
- Low maintenance: no water addition required

Standards

- Designed to be compliant with IEC 60896-21/22 and IEC 61427-1
- Classified as "Very Long Life" (>12 years) according to Eurobat guide 2015
- UL recognised component (approval pending for SBS XC 150F-FT)
- Batteries must be installed in accordance with IEC 62485-2 and local/national regulations
- Classified as non-spillable battery and approved as non-hazardous cargo for land, sea and air transportation in accordance with the requirements of ADR / RID, IMDG and IATA respectively
- The management systems governing the manufacture of SuperSafe SBS XC products are ISO 9001, ISO 14001 and OHSAS 18001 certified
