

Sealed lead acid batteries

Emergency batteries

Securaplane's emergency batteries are designed for long life, high reliability and convenience.

Batteries

Our "pure lead" sealed lead acid (SLA) batteries provide excellent performance in extreme conditions. They have six month storage capability and no scheduled maintenance.

Battery charger

Built-in battery charger automatically switches between bulk and temperature compensated constant voltage charge mode. The charger protects the batteries from overheat and overload.

Battery test

No need to remove batteries to perform energy level check; battery test function indicates battery low, medium or high.

Diagnostics

Continuous built-in test monitors charge/control logic, battery cell voltage and battery heater circuit.

Environmental control

Thermal blanket automatically controls battery ambient temperature to maximize performance.

Key features

- "Pure lead" SLA batteries
- Built-in battery charger
- Built-in battery test
- Diagnostics and BITE
- Environmental control

Key benefits

- No need to remove from aircraft for capacity check.
- No deep cycling
- No "memory" characteristics
- Low cost battery replacement
- Warranty
 - Three years on batteries
 - Five years on electronics
