## LIFT-OUT EQUIPMENT

### Fork Attachment

- Heavy duty construction with standard dimension fork slots
- Safety chain securely locks onto lift truck
- Fitted with swivel hook and safety latch
- Lifting capacity: 2725 kgs
- Weight: 16 kgs

### Hook Extension

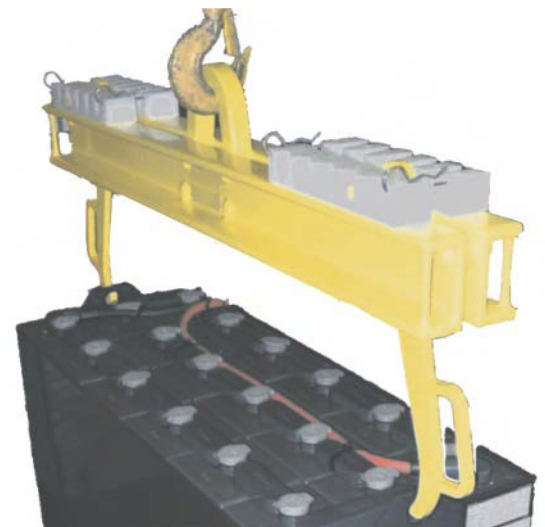

- Allows Fork Attachment and forks to extend above safety guard on lift truck
- Allows greater maneuverability of battery
- Fitted with safety hook
- Lifting capacity: 2725 kgs
- Overall length: 1075mm, weight: 6.8 kgs

### Battery Lifting Beam

- Constructed of high strength structural aluminium alloy
- Completely insulated with 4mm non-conductive, acid-resistant coating
- Will handle battery lengths 525 to 1075mm
- Available with 2 or 4 lifting hooks
- Optional safety hooks with latch
- Capacity: 2725kgs (load tested to 13625kgs)
- Weight: 23 kgs

The hook can be re-positioned in seconds to suit the battery length to ensure a safe lift.

With a 20+ year track record, the **PROSeries** Battery Beam is proven to be the safest and most durable unit on the market.
