## ROLLING TRANSFER CART

The Rolling Transfer Cart (RTC) is a great unit for truck users with just a few spare batteries. This practical device is available in 3 sizes and features twin roller-beds making it ideal for changing batteries on pallet trucks and order pickers.

The RTC complete with discharged battery can then be moved adjacent to the charger.

The metalwork is finished in acid resistant powder coat paint to ensure a long service life.

The rollers are 63mm diameter steel tube covered with 6mm PVC sleeves to improve grip and protect against corrosion.

Roller height can be specified to suit the battery roll-out height from your truck. The RTC comes complete with rubber battery back-stops and front safety latches.

The RTC is available in 3 sizes to cover a wide range of battery sizes.\*

### Models

RTC-18 (roller-beds are 228mm wide)

RTC-30 (roller-beds are 381mm wide)

RTC-40 (roller-beds are 508mm wide)
